# What are apps?

11

TALK

0

Apps (or applications) are small pieces of software dedicated to a specific task. (Mail for checking mail, photos for checking photos, etc.)

There are two types of apps:

- Preinstalled apps are apps that come with the device.
   On iPhones/iPads, these apps are created by Apple, are well integrated with Apple services and are (mostly) free.
- 3<sup>rd</sup> party apps that must be added to the device (typically through an app called the Appstore). 3<sup>rd</sup> party apps usually have more features, but may have a price or require you to create an account.

## For example, on an iPhone...

# Native Apps

75

## **Apps for Basic Functions**

Messages-text messages

Contacts- address book

Safari-internet browser

Mail- email manager

Settings-settings app

Calendar- schedule events

Reminders- create lists

Maps- get directions

Appstore- download apps

Camera- take pictures

Photos- browse photos

## **Apps for Basic Functions**

Pages- word processor (like MS

Word)

		-	
<b>N</b>			~

Numbers-spreadsheets (like MS

Excel)

- Keynote- presentations (like MS
- PowerPoint)

Wallet- manage payments

Files-files manager

Notes- write notes

Facetime- video calls

Stocks- check stocks

## **Apps with Premium Content**

iBooks- read PDFs, read free

eBooks, purchase eBooks

Music- listen to music, make

playlists, download albums

News: Read news- some free

articles available but also

offers magazines/newspapers.

Apple TV: Stream movies and

television, both subscription or rental.

Apple Arcade: play games without

paying for each individual game.

Apple Fitness: Check fitness data,

access Apple Fitness + classes.

# **3rd Party Apps**

**3rd party apps** can be downloaded from the Appstore. This includes apps like Facebook, Twitter, Instagram, Spotify, Pandora, Waze and many, many more. 3<sup>rd</sup> party apps can also be games such as Words With Friends, Solitaire, Candy Crush, etc.

What's the catch? Many apps require some sort of fee. There are three types of apps you will see:

- Free: These apps are completely free. Press GET to install them.
- Freemium/In-App Purchases: These apps are free to download, but may have content within the app that is not free (premium features). Alternatively, apps like Netflix require a subscription to use.
- **Paid:** These apps have an upfront, one-time fee.

You can pay for apps with a credit card that is loaded into your Apple account. Don't want to input a credit card? That's okay! You can buy prepaid Apple gift cards at most stores.

Are all apps safe? **Unfortunately not**. While Apple moderates the Appstore, malware and spyware often sneak in. Be sure to read the detail page of each app you download. It will include information about the app, who made it, the app's star ratings and reviews from other users. Avoid apps with low ratings and downloads. **Today:** Shows you apps that are popular today.

**Games/Apps:** Shows you a list of popular or recommended games and apps.

**Arcade:** Apple's subscription game service.

Search: Allows you to search for a new app.

On the today tab, click on the icon in the top-right corner to access the **Account Center**.  Search **TUESDAY, NOVEMBER 16** Today NOW AVAILABLE NOW STREAMING Man in the Arena: **Tom Brady** The NFL icon details his career in a new ESPN+ series. **ESPN: LIVE SPORTS** & SCORES UPDATE Man in the Arena:... NOW TRENDING

Top Games Right Now

**Purchased:** Shows you all the apps you purchased.

Subscriptions: Manage subscription for apps.

**Redeem Gift Card or Code/Send Gift Card by Email**: Redeem a gift card, or send one to another person.

Available Updates: Update apps that need to be updated.

## Reorganize Home Screen

Tap and hold on an app to open a menu of quick options.

Choose edit home screen.

Now you can hold and drag apps around or hit the minus sign to remove an app.

## **Creating Folders**

You can also drag an app on top of another app to create a folder. (Drag the apps out of a folder to delete it.)

# Add Widgets

When the home screen is in edit mode (as described in the previous step), hit the + in the top-right corner to add widgets.

Search or browse for the widget you want. Choose the layout and click "add widget". Now you can place it wherever you want on the screen.

# **App Library**

Apps can be added from the app library. Just scroll to the last page and tap/hold the app you want to add. Then you can drag it to the home screen.

# App Permissions & Privacy

#### Allow "Facebook" to track your activity across other companies' apps and websites?

[Here, in addition to other screens, Facebook can explain why users should allow tracking.]

#### Ask App not to Track

Allow

Nowadays, apps want access to a lot of personal data. Fortunately, iPhones will prompt you if an app is asking for permissions.

Apps may ask for permission to: track you across other websites/apps, access camera/photos/videos, access your location, access contacts, access the microphone/record audio and more.

It's important to decide what information you want apps to have and what information you would prefer to keep private.

#### "LINE WORKS" Would Like to Access Your Photos

Allow "LINE WORKS" to access your photos to send image or video by message/mail, to make a voice/video call, and to take a photo to set as my profile image.

#### Select Photos...

Allow Access to All Photos

Don't Allow

## **Privacy Settings**

### Go to Setting > Privacy

- Location: Enable to share your location with an app.
- **Permissions:** Permissions to access microphone, camera, cellular data, etc.
- Tracking: Enable/disable the ability of an app to track your device/internet activity.
